Release Details

Release Date: August 22, 2022

This release of Azul Zulu Builds of OpenJDK 11, 17, and 18 incorporates a fix for the C2 compiler crash: [JDK-8292260](#).

The release includes the following versions:

Azul Zulu Version*	Update Type**	JDK Version	Based on		JavaFX Version
			Azul Zulu Version	JDK Version	
11.58 (CA) 11.58 (SA)	PSU	11.0.16.1	11.58	11.0.16	18.0.2+101
17.36 (CA) 17.36 (SA)	PSU	17.0.4.1	17.36	17.0.4	18.0.2+101
18.32 (CA) 18.32 (SA)	PSU	18.0.2.1	18.32	18.0.2	18.0.2+101

* Azul provides three types of distribution packages for each Java version:

- **SA** distributions are tested, certified, and commercially supported Azul Zulu builds of OpenJDK. Azul ensures that the software that uses the Accessible APIs of the product does not have to include specific licenses and that such use does not contaminate the code or intellectual property of such software with any license requirements.
- **CA** are Azul Zulu builds of OpenJDK that are free to download and use.

** Update type:

- **PSU** (Patch Set Updates) incorporates all fixes in the corresponding CPU, as well as additional non-security bug fixes. Azul Zulu PSU releases incorporate both security fixes and other changes that align the release contents with the associated OpenJDK project quarterly release. PSU releases are available in SA, NV, and CA distributions.

All the configurations in the October quarterly update release include the fix. Please email us at support@azul.com if you need a fix for these platforms sooner.
