Azul Zulu 8.64 (8u345-b01)

Release Notes

Revision History

Revision	Date	Description
1.0	August 8, 2022	Initial version of the document.
1.1	August 8, 2022	Corrected JFX version.

Release Details

Release Date: August 8, 2022

This release fixes an issue that may cause a regression in Azul Zulu 8.64 (8u342-b07) introduced by the fix for [JDK-8194154](#), which disabled the possibility of changing the "user.dir" property.

The release includes the following versions:

Azul Zulu Version*	Update Type**	JDK Version	Based on		JavaFX Version
			Azul Zulu Version	JDK Version	
8.64.0.19 (CA) 8.64.0.20 (SA)	PSU	8u345-b01	8.64	8u342-b07	8u342-b01

* Azul provides three types of distribution packages for each Java version:

- **SA** distributions are tested, certified, and commercially supported Azul Zulu builds of OpenJDK. Azul ensures that the software that uses the Accessible APIs of the product does not have to include specific licenses and that such use does not contaminate the code or intellectual property of such software with any license requirements.
- **CA** are Azul Zulu builds of OpenJDK that are free to download and use.

** Update type:

- **PSU** (Patch Set Updates) incorporates all fixes in the corresponding CPU, as well as additional non-security bug fixes. Azul Zulu PSU releases incorporate both security fixes and other changes that align the release contents with the associated OpenJDK project quarterly release. PSU releases are available in SA, NV, and CA distributions.

This release does not include Azul Zulu 8 on Arm32, MIPS, PPC, or QNX platforms, as the original problem has a very limited impact on the embedded use cases. All the

configurations in the October quarterly update release will include the fix. Please email us at support@azul.com if you need a fix for these platforms sooner.

Fixed Issues

Azul Zulu Bug Fixes

The following table describes the Azul Zulu changes implemented in this release.

OpenJDK Patch ID	Synopsis
JDK-8290832	It is again possible to change "user.dir" in JDK8
